August 24, 2018

This statement is submitted in response to your request concerning items sold by J.V. Converting Company, Inc. (JVCC) and compliance with certain legal standards or requirements as explained below. The items sold by JVCC are industrial products manufactured outside of California. They have not been assessed for consumer sale or use. All statements are made to the best of JVCC's knowledge, based on information provided by our suppliers, and considered true as of the date above, and are subject to the disclaimer at the end of this statement.

JVCC Series	JVCC Item Number(s)
Aluminum Foil Tapes (except matte black)	AF-GC-5, AF12, AF20, AF20-SW, AF30, AF30-SW, AF50, FSK-A

California Proposition 65

Subject to the qualifications below, upon our suppliers' reviews of the materials used in the manufacturing processes of the items above, it has been determined that none of the listed substances are: (i) intentionally added during the manufacturing process or (ii) known or expected to be present at an exposure level requiring a warning under the current provisions of California Proposition 65, the Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65).

None of the Proposition 65 listed substances are believed to be contained in the above JVCC items and the manufacturer does not use or intentionally add it. This representation is based solely on a compilation of the most recently received information from our vendors and their review of their raw materials and from information from their suppliers. Proposition 65 states "no significant risk levels" for carcinogens (NSRL) and "maximum allowable dose levels" for chemicals that may cause reproductive toxicity (MADL) in terms of theoretical exposure levels of micrograms per day ($\mu\text{g}/\text{day}$) but raw material suppliers refer to the presence of the listed substances in terms of actual concentration levels of parts per million (ppm). California has not, however, published any guidelines or tables that could be broadly applied to enable manufacturers or others to readily convert actual concentration levels to theoretical exposure levels and therefore statements to the effect that listed substances are present at levels that do not require warnings depend on certain assumptions about consumers' exposure and cannot be precise; JVCC disclaims any responsibility to make any determination concerning the equivalence of any ppm that may be present in the materials to $\mu\text{g}/\text{day}$ for any particular listed substance and relies solely on our manufacturers' conclusions.

Few suppliers test for listed substances and many rely solely on information provided by their raw material vendors; some state that catalysts used in the manufacturing process are proprietary to their vendors and may contain phthalates resulting in residual levels in the materials. Proposition 65 also lists some substances for which no NSRL or MADL has been published but in such cases, the suppliers remain subject to the provisions of Proposition 65 requiring that businesses that knowingly expose individuals to such chemicals must provide a warning unless they can show that exposure at the level present in the materials poses no significant risk of cancer or reproductive toxicity. JVCC has not received any information from a supplier that any of the above mentioned goods require a warning under this provision. JVCC does not conduct any independent tests for listed substances and disclaims any responsibility to do so.

DISCLAIMER

JVCC does not conduct any independent tests of our goods sold and disclaims any responsibility to do so. JVCC does not manufacture these goods; the goods are purchased from outside, unaffiliated suppliers that have provided Material Safety Data Sheets or other information on which this Statement is wholly based. ASIDE FROM THE STATEMENTS ABOVE, NO WARRANTY, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR ANY PURPOSE, OR ANY OTHER WARRANTY OR GUARANTEE IS MADE OR IMPLIED REGARDING THE MATERIALS OR THE GOODS OR THE REPRESENTATIONS OF THE SUPPLIERS, THE RESULTS TO BE OBTAINED FROM THE USE OF THE GOODS, THE SAFETY OF THE GOODS, OR THE HAZARDS CONNECTED WITH THE USE OF THE GOODS. ALL SUCH WARRANTIES ARE EXCLUDED.

This statement is not intended to modify any existing supply agreement or other agreement between the parties or relieve our customers from their obligations to: (i) comply with applicable laws; (ii) provide accurate data for decorating and labeling of goods; and (iii) use the goods in a manner consistent with those data. JVCC disclaims any responsibility for and shall not be liable for: (i) any modification of the goods after shipment; (ii) buyer's use or storage that may result in

degradation of the goods or migration of other chemicals into the goods; (iii) any non-conforming materials or any modification of materials by our supplier; (iv) any addition to or amendment of any applicable European, U.S., state or local laws or regulations relating to the raw materials, or the goods; or (v) actions required by our suppliers or our customers to comply with applicable European, U.S., state, and local laws relating to the raw materials or the goods. Buyer is responsible for determining and applying the law and regulations that may be applicable to the intended use of the goods and determining if the goods are suitable for their intended use. The chemical compositions of the raw materials, and the goods being manufactured, are comprised of proprietary formulations and, therefore, are confidential.

This statement: (i) is effective only as of the above date; (ii) is not assignable; (iii) revokes any prior statements or representations by JVCC with respect to the subject matter; (iv) is subject to our suppliers' statements and disclaimers; and (v) may be withdrawn by JVCC at any time.

Should you need additional information concerning the composition of the Goods, you may contact your sales or customer service representative.

Sincerely,

J.V. CONVERTING COMPANY, INC.
