**\*\*Made of non-woven cellulosic material derived from wood pulp, this product is completely non-toxic to humans, animals and the environment.**

**In the biodegradable, all ingredients are totally inert when you receive them. The degradation process is mainly the de-bonding of the elements into microscopic inert molecules. The biodegradable film is retarded by bacterial action and ultraviolet radiation, moisture, abrasion and disintegrates when buried.**

**Complete degradation will occur outdoors in six to twenty-four months dependant upon environment and climatic conditions.**
